

IDL Company Profile

A commitment to quality, innovation and customer service

Manufacturer of the World-renowned Fastlane and Rayonet product ranges

Bespoke system design and integration

ISO9001:2000 Approved Quality Standards

Leading member of the British Security Industry Association (BSIA)

Integrated Design Ltd specialises in the design and manufacture of electronics and software for the security industry. Through intensive research and development since 1985, a range of standard products has evolved, which offer innovative solutions to many of today's most common security dilemmas. Our main ranges, Fastlane Entrance Control and Rayonet Perimeter Protection, are exported across the world through a network of 3rd party dealers and distributors.

History

Established in 1985, Integrated Design Limited (IDL) began by designing electronic and software solutions and products. Since then the company has grown to be an influential force in the design of integrated systems and the manufacture of market leading products for the Security and Facilities Management industries.

Expertise

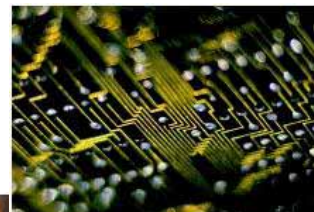

By developing and maintaining expertise in the application of electronic and information technology to specific market requirements, IDL has built a reputation for innovation and excellence in system design and product development.

Investment in Design and Development

The dynamic nature of the markets in which IDL operates, demands the constant updating of the products and services it supplies. IDL consistently reinvests in design and development, has dedicated research facilities and a full time product development team.

Products and Services

IDL supplies a range of innovative manufactured products, many of which are unique or offer unique features. IDL provides bespoke system design and integration, and offers a range of consultancy and project management services.

Quality

IDL operates a Quality Management System that meets the new ISO9001:2000 International Standard for our design, development, and manufacturing activities, including associated software products. The scope of our registration also includes the provision of technical services and consultancy.

Our products are CE marked in accordance with the relevant Electro Magnetic Compatibility, Low Voltage and Machinery European Union Directives; IDL has in-house test facilities for product testing and assessment.

Commitment to Service

IDL is committed to customer satisfaction, providing quality solutions supported by the highest quality service. From bespoke system design to the range of manufactured products that IDL supplies, emphasis is placed on consultation to gain a detailed understanding of customer needs. Then, through the application of IDL's unmatched market knowledge and expertise, developing flexible solutions that precisely match customers' current and future requirements.
