

IDL Update

Keeping you in touch with the latest developments
at Integrated Design Ltd

CPD Accredited Seminars

IDL now have 3 free of charge courses formally approved for CPD purposes. These courses are designed to educate construction and facility professionals in the latest developments in Entrance Control. The three courses are

1. **The Choices in Entrance Control and their Aesthetic Implications.**
2. **The UK Disability and Discrimination Act (DDA) and its Implications on Entrance Control.**
3. **The Choices in Entrance Technology for Providing Effective Security.**

There is also an accompanying booklet to go with these courses.

Whilst these courses have been designed for construction professionals they are also highly relevant for security installers, security consultants, facility and security managers who want to learn more about the latest developments in entrance control as well as the implications of the Disabilities Discrimination Act which comes in to full effect later this year. If you are interested in any of these courses or the booklet please contact us and we can arrange to run one of the hour long seminars either at our offices near Heathrow or at your own location.

Additionally if you know of any architects or other people who may be interested in this we are happy to provide some introductory literature for you to pass on. Just let us know.

Installations

In order to provide a complete service to our trade customers, IDL are now offering an optional installation service.

This service is limited to the planning and actual installation of our Fastlane turnstiles and assisting the integration to a 3rd party access control system; it does not include installing access control systems themselves. By offering this service we can ensure that the Fastlane system is up and running as quickly and easily as possible.

When we provide quotations we can provide "Supply Only", "Supply & Commissioning", and "Supply & Installation Services" price options.

IDL also provide free product training at our offices to all our customers.

To find out more about any of these services please contact our sales department.

[IDL Webpage](#)

We have updated our web page with an easier to use interface for quick and easy access to what's on offer. _

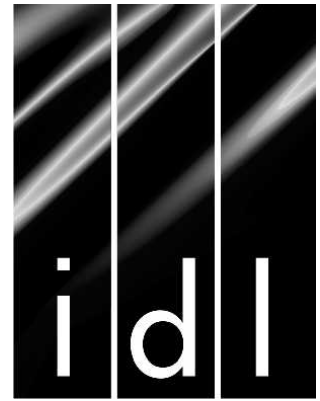

What is on offer?

Just one click away is a whole range of details and information to help in choosing the right system for your needs. These include: detailed drawing packs for each of the Fastlane, Fastlane *plus* and Rayonet ranges as well as Door Detective. You can get application manuals and brochures with movies and photos available online, for you to see the products in action.

Also available for view and download are Fastlane *plus* extras such as floor protector and pedestrian counting technical details.

You can find out our customer list, quality credentials and procedures or click on [News](#) to view or download any of our previously released press releases or IDL Updates.

Visit www.idl.co.uk and see what you can find out.

[Exhibition News](#)

We have just finished exhibiting at IFSEC 2004 at the NEC in Birmingham. It was another successful show this year with many delegates visiting our stand to gather information or request a demonstration of our Fastlane *plus* turnstiles or Door Detective. We had to keep the brochures well stocked.

Integrated Design was short-listed for the "Exporter of the Year Award". One of our major exporting partners is Smarter Security from the USA. Jeff Brown their president attended the exhibition and was introduced to HRH Prince Michael of Kent who made a special visit to the Integrated Design stand.

More recently we have just returned from Hong Kong 's Asian Securitex 2004 exhibition.

Forthcoming exhibitions include ASIS in Dallas in the USA (September), Expo Protection in Paris (November), To find out more about these events please contact our exports department.

[New Product Update](#)

We have now launched a low cost Door Detective unit. There are now 3 versions of the Fastlane Door Detective available. These are as follows.

Door Detective CL, the classic Door Detective in an architecturally inspired enclosure finished in either silver or black,

Door Detective EL, a budget model finished in a black Perspex moulded enclosure only,

Door Detective IP, an outdoor version of the Door Detective which comes with heaters and is IP55 rated.
