Fastlane® FastCount
with Ethernet Connectivity

F
**fastlane**
turnstiles by **IDL**

Setting the Standard

Fastcount with Fastlane *Connect* delivers a solution to record population data for several allocated zones within your building. Fastcount records entry and exit information from selected Fastlane Turnstiles and Door Detective products and outputs data for external analysis.

Using Fastlane *Connect*, The TCP/IP communications interface embedded into selected Fastlane and Door Detective products, Fastcount communicates on the same local area network receiving live count information from your selected devices and will allow count information to be supplied from several separate zones configurable on setup.

Barrier type

N/A
ARM
OPTICAL

Secure

– Locally authorised
   user control over LAN
   communication interface

Accurate

– Uses the acclaimed Fastlane
   multi beam infrared matrix
   for accurate passage
   and alarm information

Features

– Easy set up and intuitive use

Aesthetics

– IDL designed GUI
   for easy access
