Features

- Locking brake option
- Additional barrier heights
- Additional lane widths
- Security level

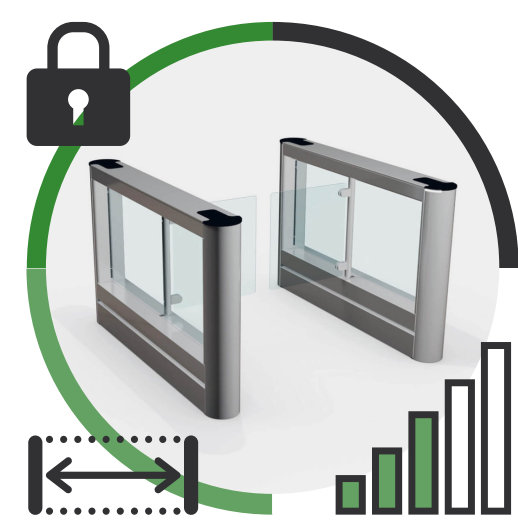

GLASSGATE 150
An elegant and highly functional Speedgate solution, the Glassgate 150 is IDL's most popular entry level security solution.

GLASSGATE 200 PLUS
The Glassgate 200 Plus' slim pedestal provides a high level of security with its tall, dual swinging glass barriers and locking brake feature.

GLASSGATE 400
With 1.8m laminated and toughened safety glass barriers, the Glassgate 400 is the highest level of physical deterrent available in the Speedgate range.

GLASSGATE 155
A secure, flexible entrance control designed with leisure facilities in mind, it features wider lanes to accommodate sports wheelchairs.

GLASSGATE 250
Designed with a wider pedestal, this model accommodates the integration of a wider range of third-party access control devices.

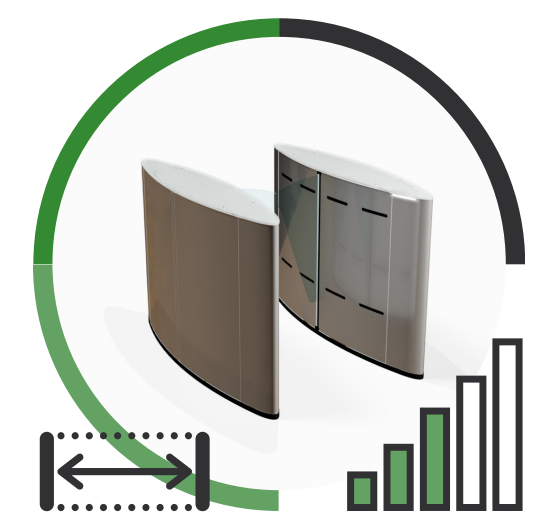

GLASSGATE 400 PLUS
Similar to the Glassgate 400, the 400 Plus is suited to high security applications. It has the additional benefit of detecting attempted side-by-side dual entry.

GLASSGATE 200
The Glassgate 200 is perfect for facilities with limited floorspace. It features slim pedestals with a single tall glass barrier.

GLASSGATE 300
One of our best-selling products for higher security applications. The Glassgate 300's tall glass barriers provide a clear deterrent for unauthorised users.

GLASSWING
Providing a medium level of security, the Glasswing's glass barriers retract inside the pedestal, setting it apart from the other turnstiles in the Speedgates range.
