

Integrated Design Limited (IDL) Take-back Scheme

As a manufacturer of electrical and electronic equipment (EEE) IDL understands our responsibility to offer a take-back scheme for our products. However, due to the size and weight of most Fastlane products, customers may wish to use suitable local waste disposal facilities. Waste electrical and electronic equipment (WEEE) must be disposed of separately from the municipal waste stream.

If you wish to use our take-back scheme, contact your local sales representative or installer for more details about how to arrange this. Alternatively, you can use our [Contact Us](#) web page. WEEE will only be accepted as agreed with prior notice.

As stated in our standard terms and conditions of sale, it is the customer's responsibility to organise and finance the cost of return of the product. IDL will then finance the environmentally sound disposal.
